Preliminary Data:

North District

1/1/18 – 12/31/18

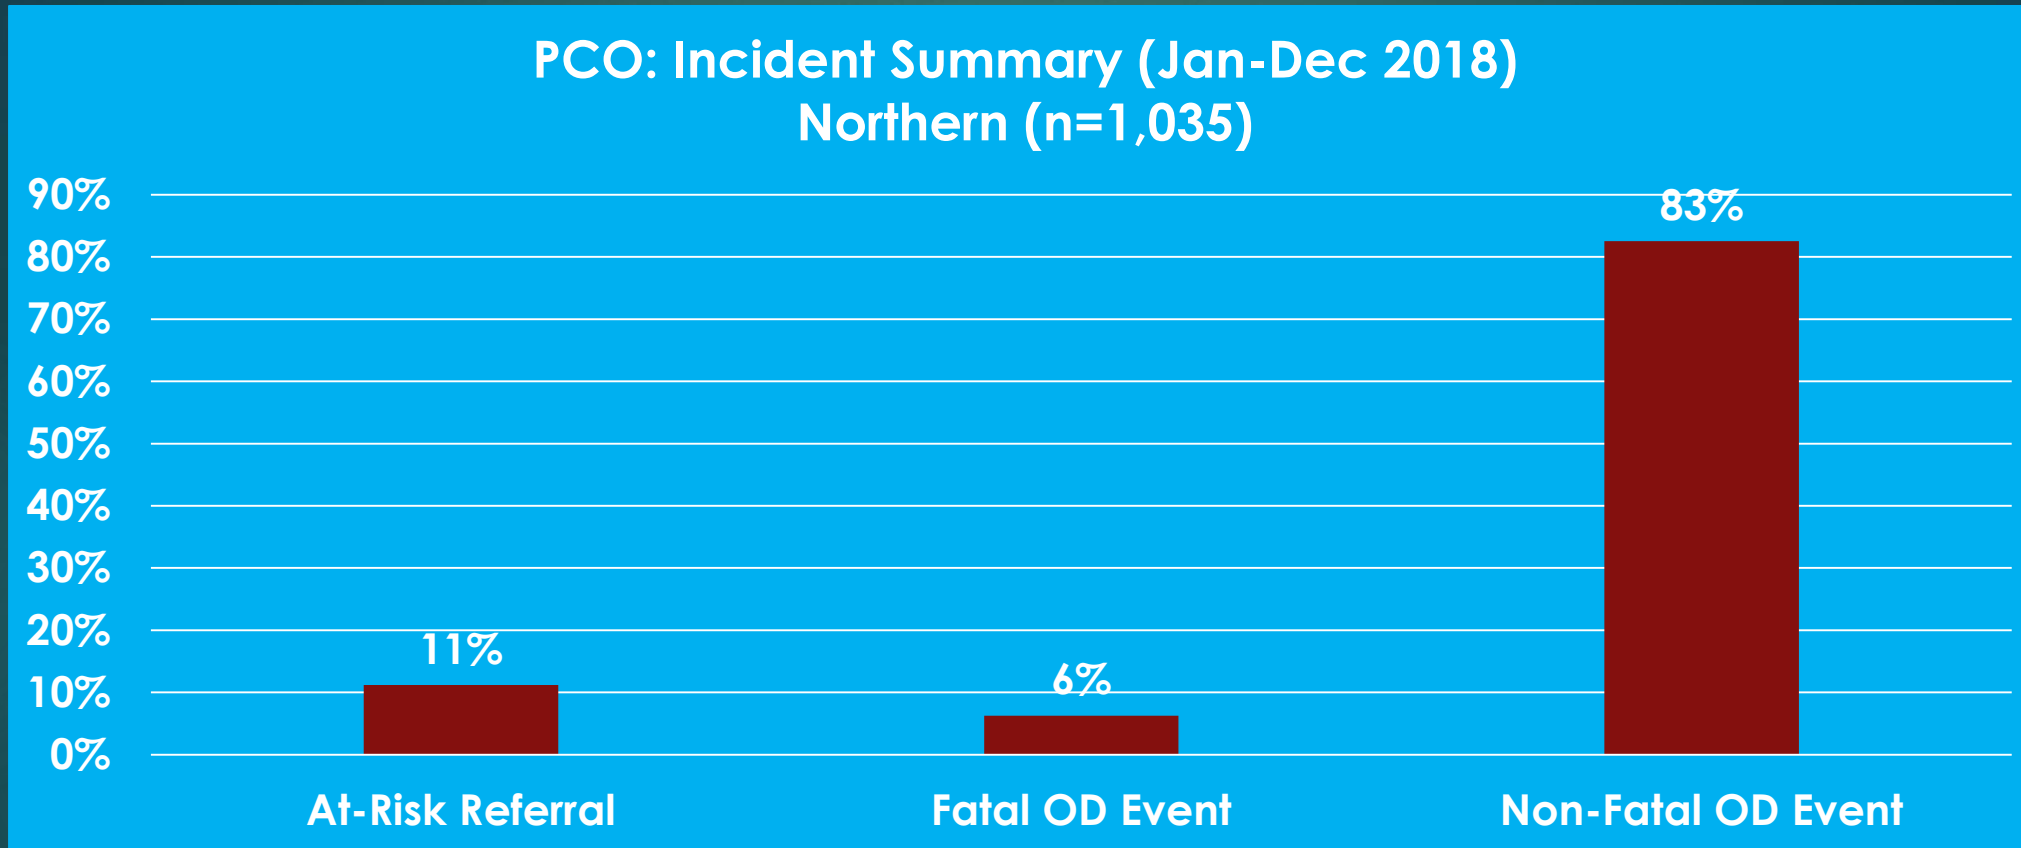

Type of Incident: North v. South

1/1/18 – 12/31/18

There were a total of **1,605 incidents** reported in the county between 1/1/18 and 12/31/18 as recorded in the PCO database. **Thirty-six percent (570)** of these occurred in the “Southern” district and **64% (1,035)** occurred in the “North”.

Type of Incident: North District 1/1/18 – 12/31/18

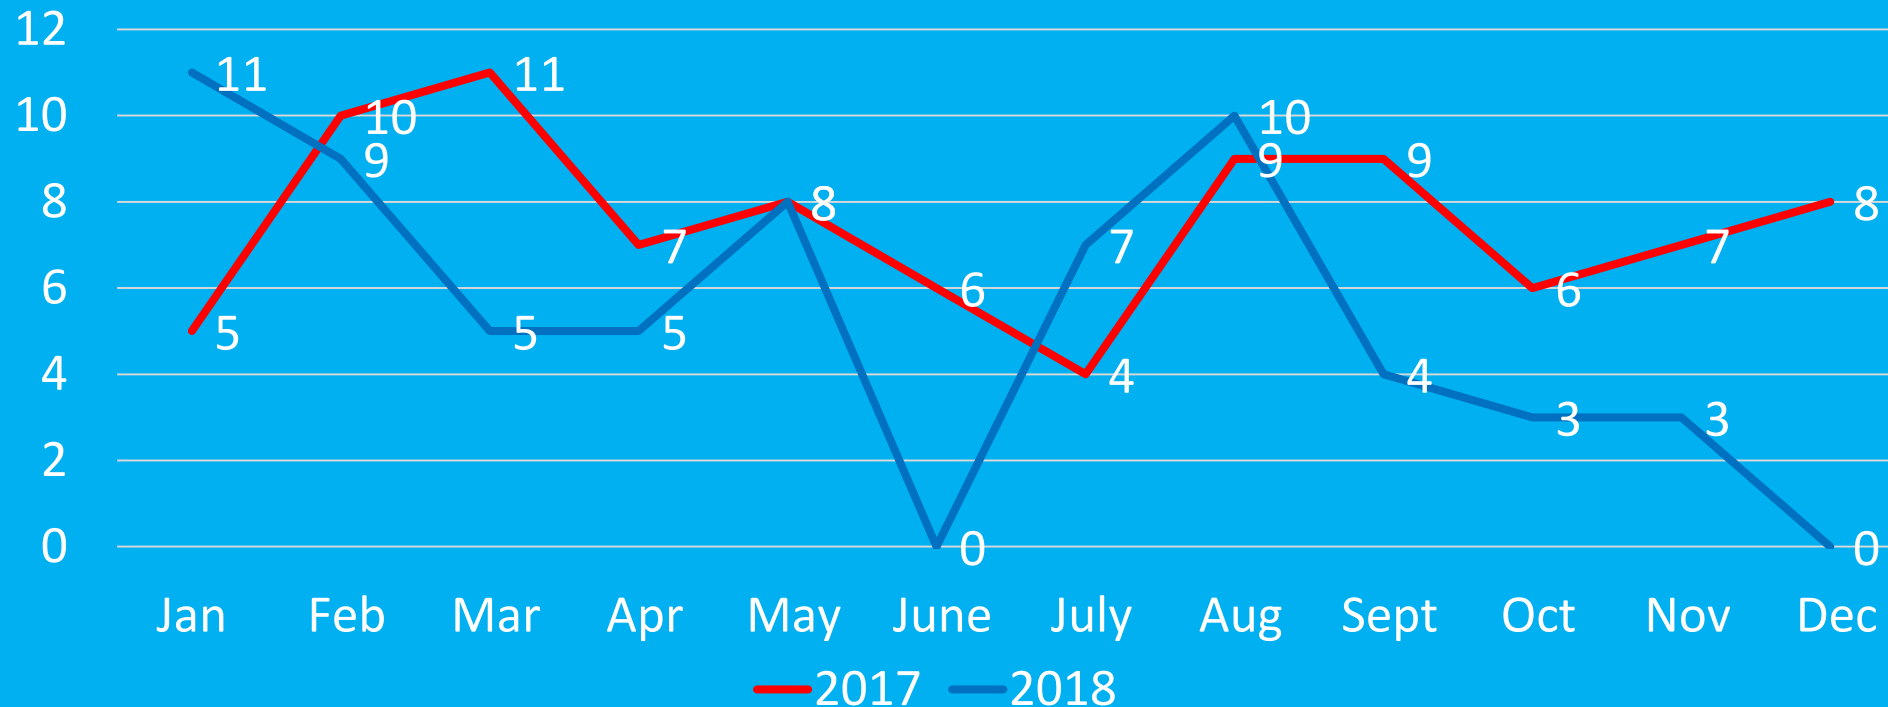

Kelley Research Associates

There were a total of **1,035 overdose incidents** recorded in the “North” district between 1/1/18 and 12/31/18: **65 (6%) were fatal**; **854 (83%) were non-fatal**; and **116 (11%)** were categorized as “at-risk” individuals.

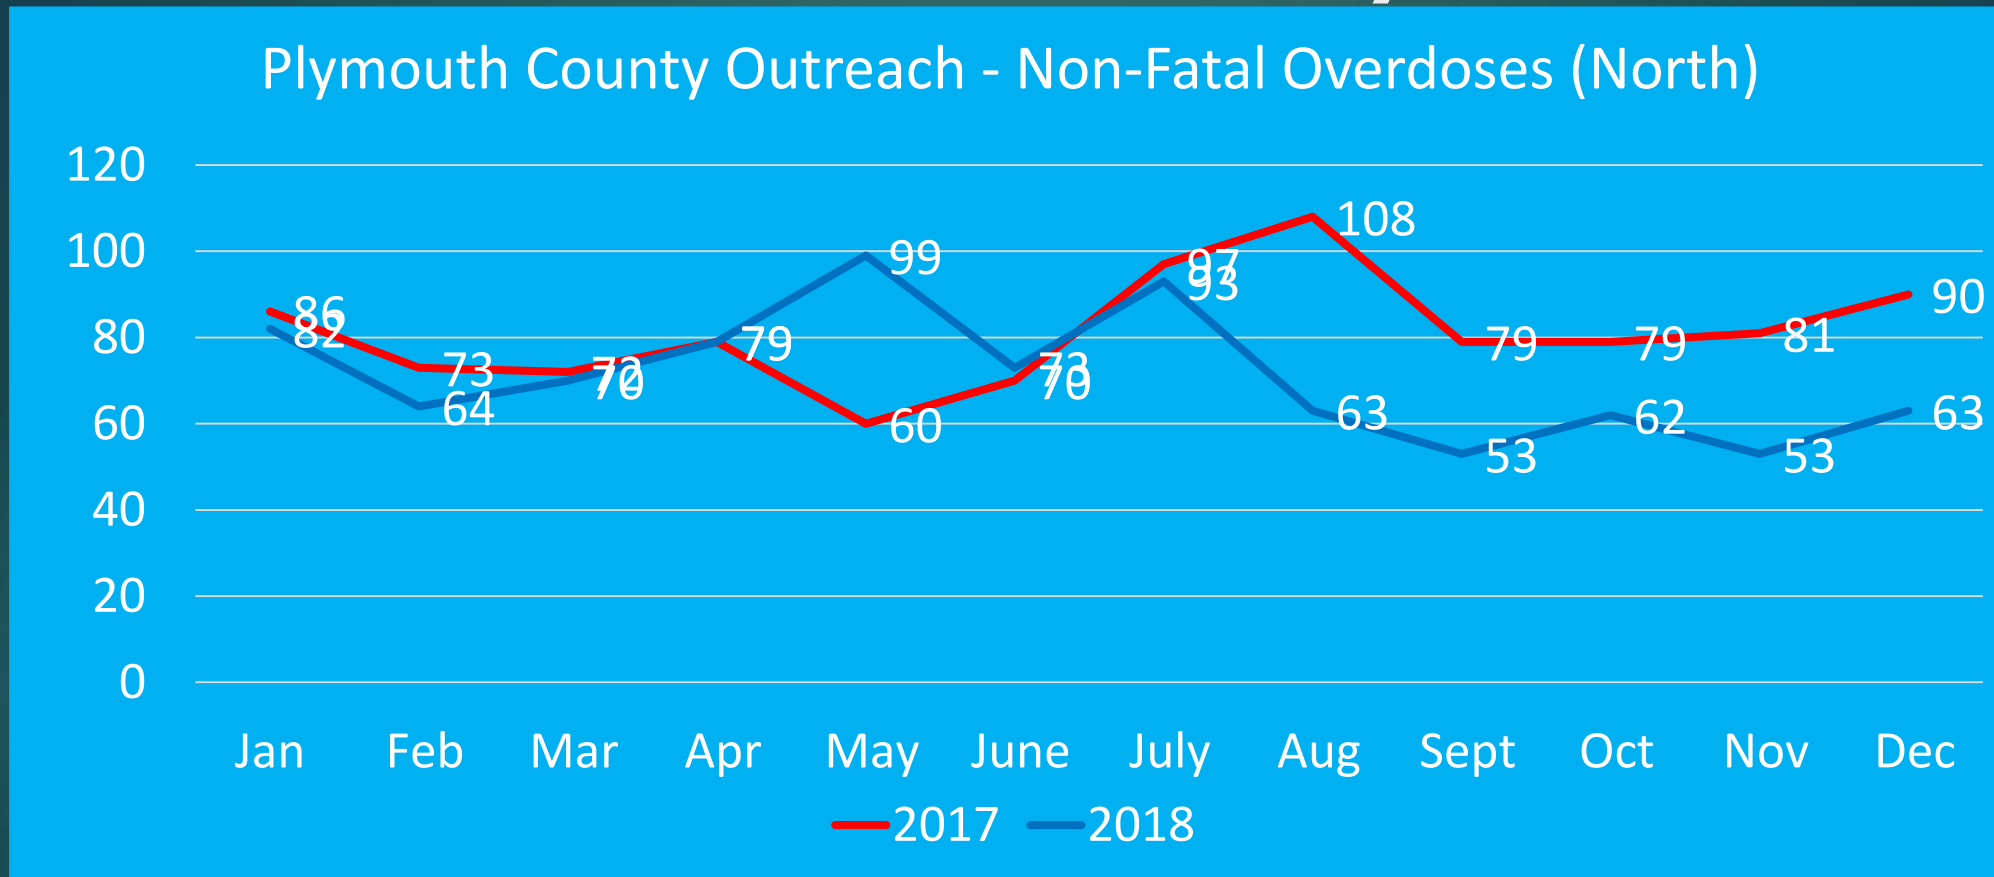

Fatal Incident Monthly Trend: North

Plymouth County Outreach - Fatal Overdoses (North)

There was an average **5 fatal ODs per month** in the “North” district in 2018. This is lower than the 8 average during this same time frame in 2017. There was a 4-month trend with 5 or fewer fatal OD’s, with 0 reported in December.

Non-Fatal Incident Monthly Trend: North

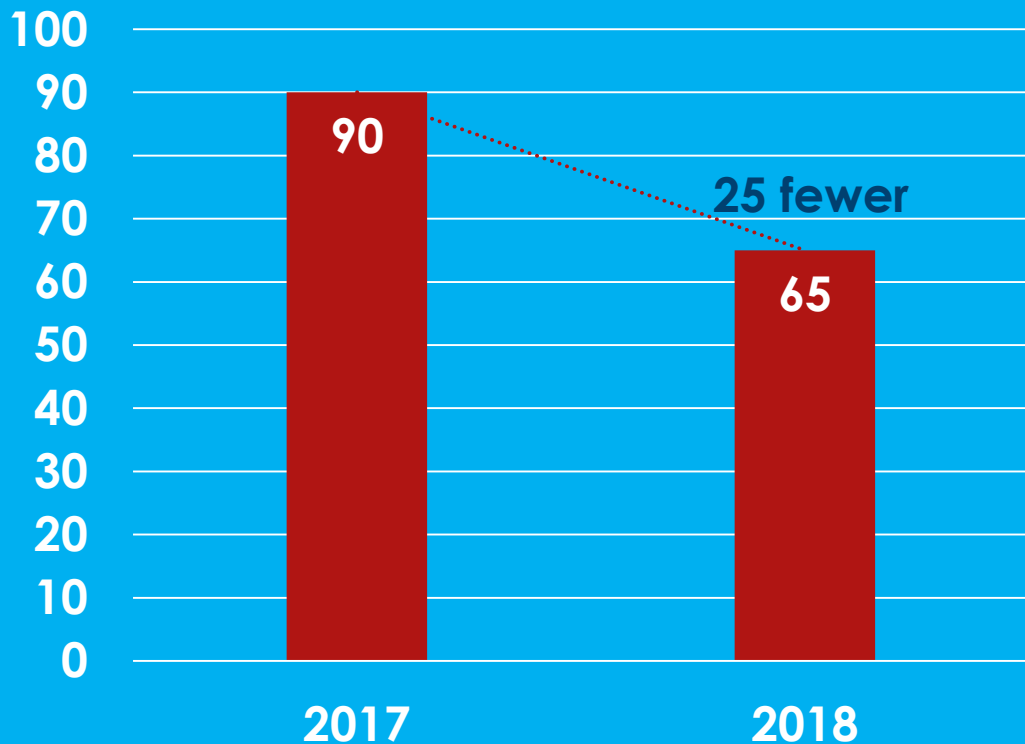

Kelley Research Associates

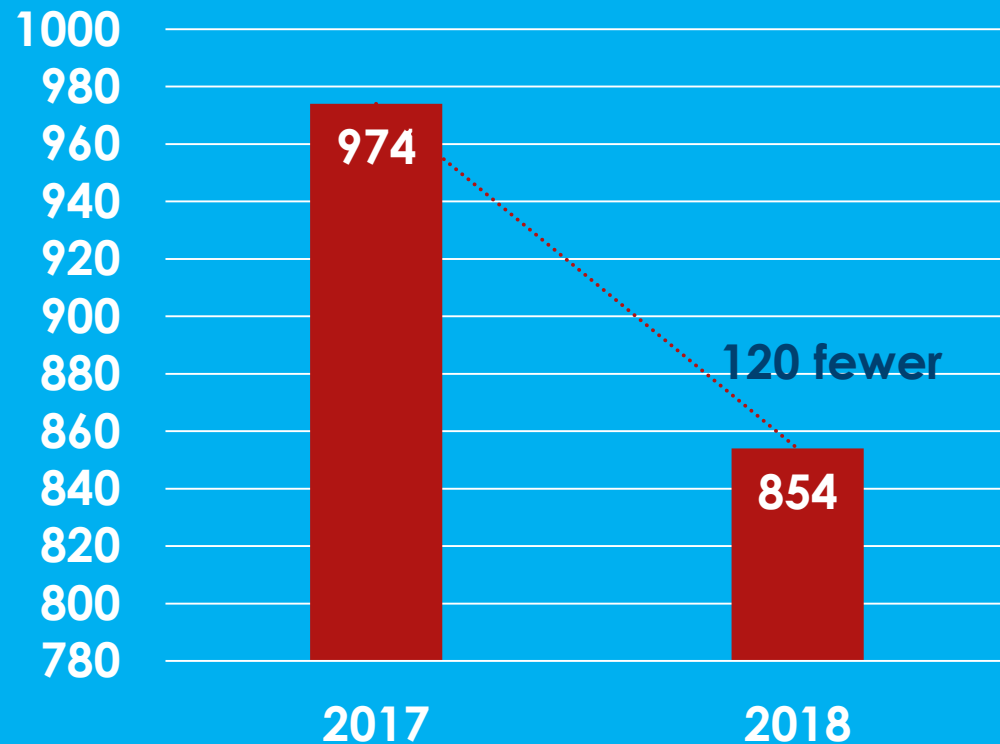

There has been on average **71 non-fatal ODs per month** in the “North” district during 2018. This is **9%** lower than the average monthly total of **81 non-fatal overdoses** during the same period last year. December was the 6th month in a row where 2018 monthly non-fatals is trending lower than 2018.

Comparison of 2017 to Preliminary 2018 Data

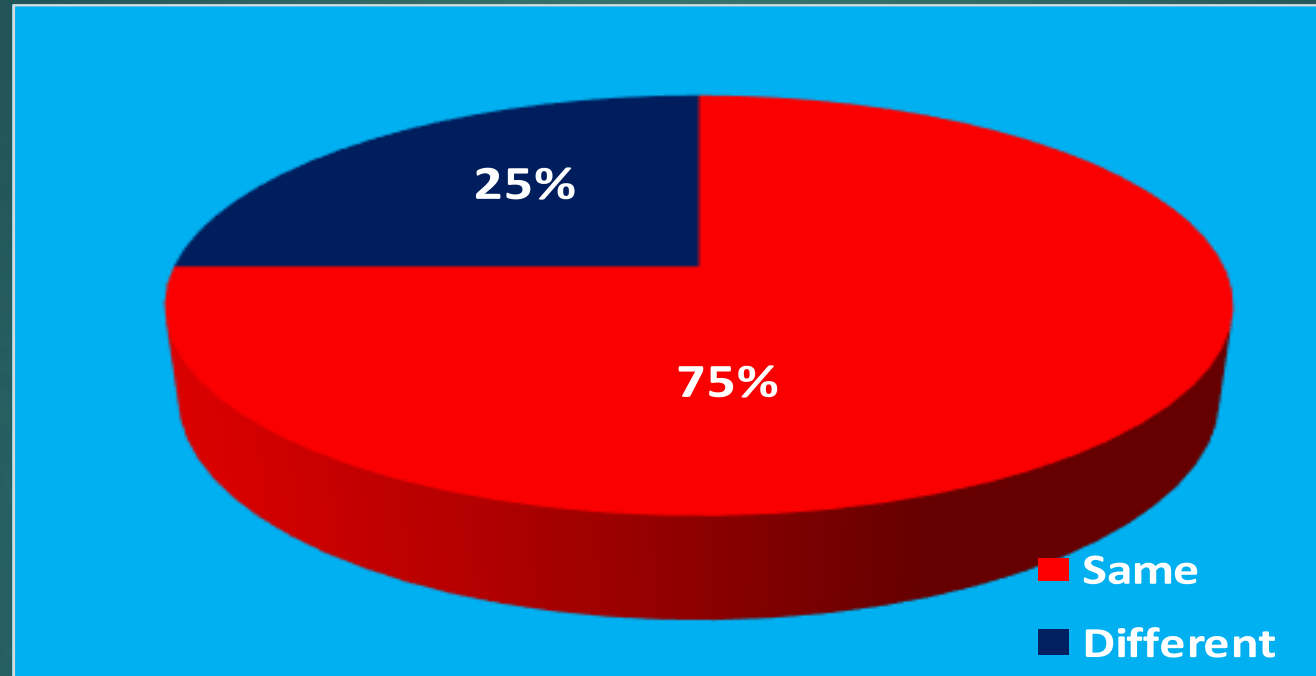

Preliminary Fatal Overdoses (2017 vs. 2018)

Preliminary Non-Fatal Overdoses (2017 vs. 2018)

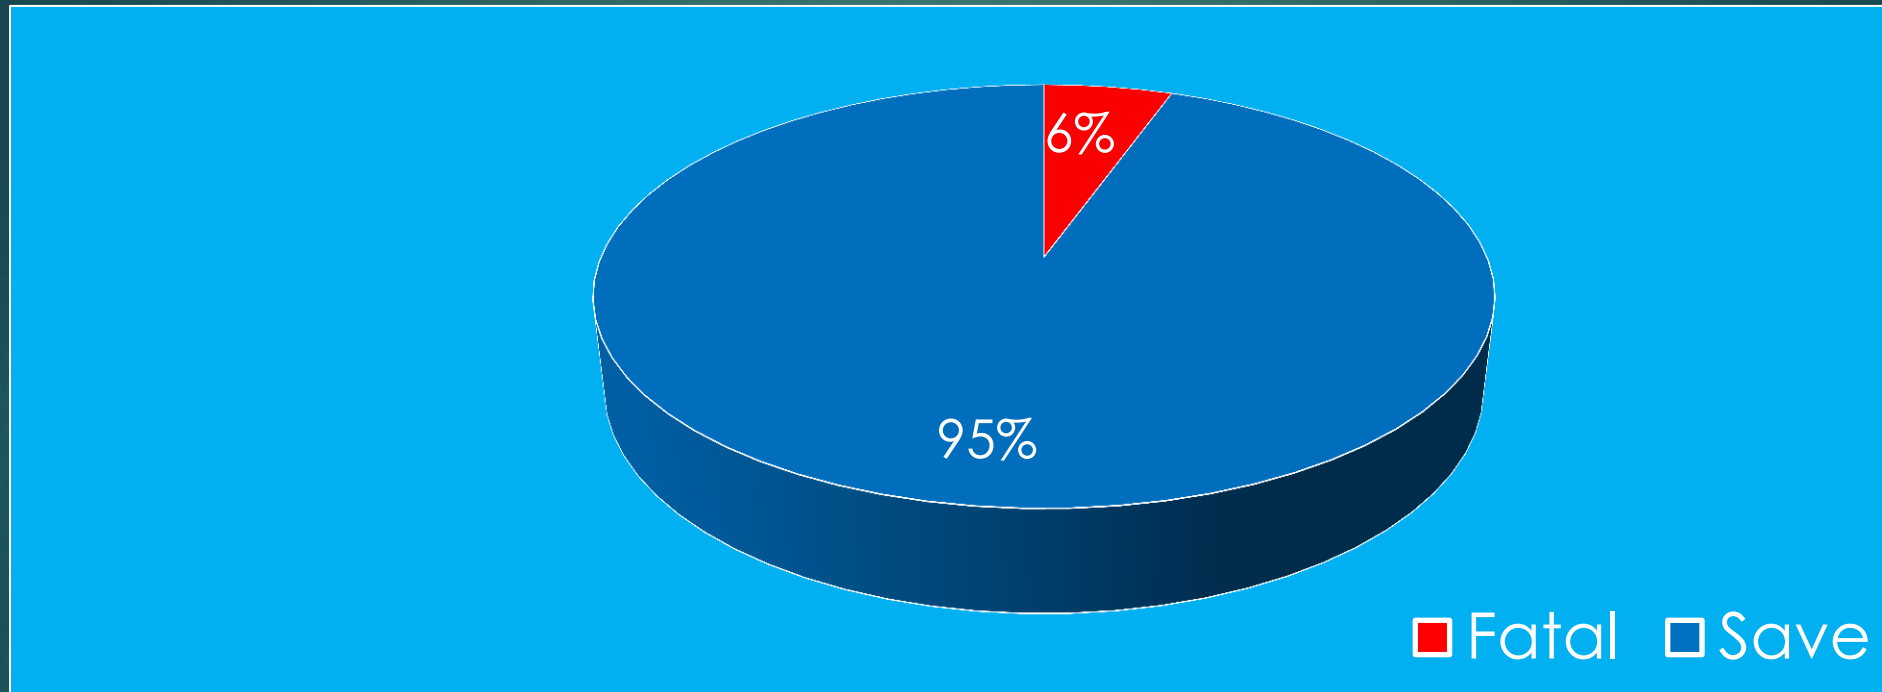

Incident vs. Resident Town: North (1/1/18 – 12/31/18)

In **774 incidents (75%)**, the individual with Substance Use Disorder resided in same town that the incident occurred. However, in **261 (25%)** of the incidents the person was from a different town than where the incident occurred.

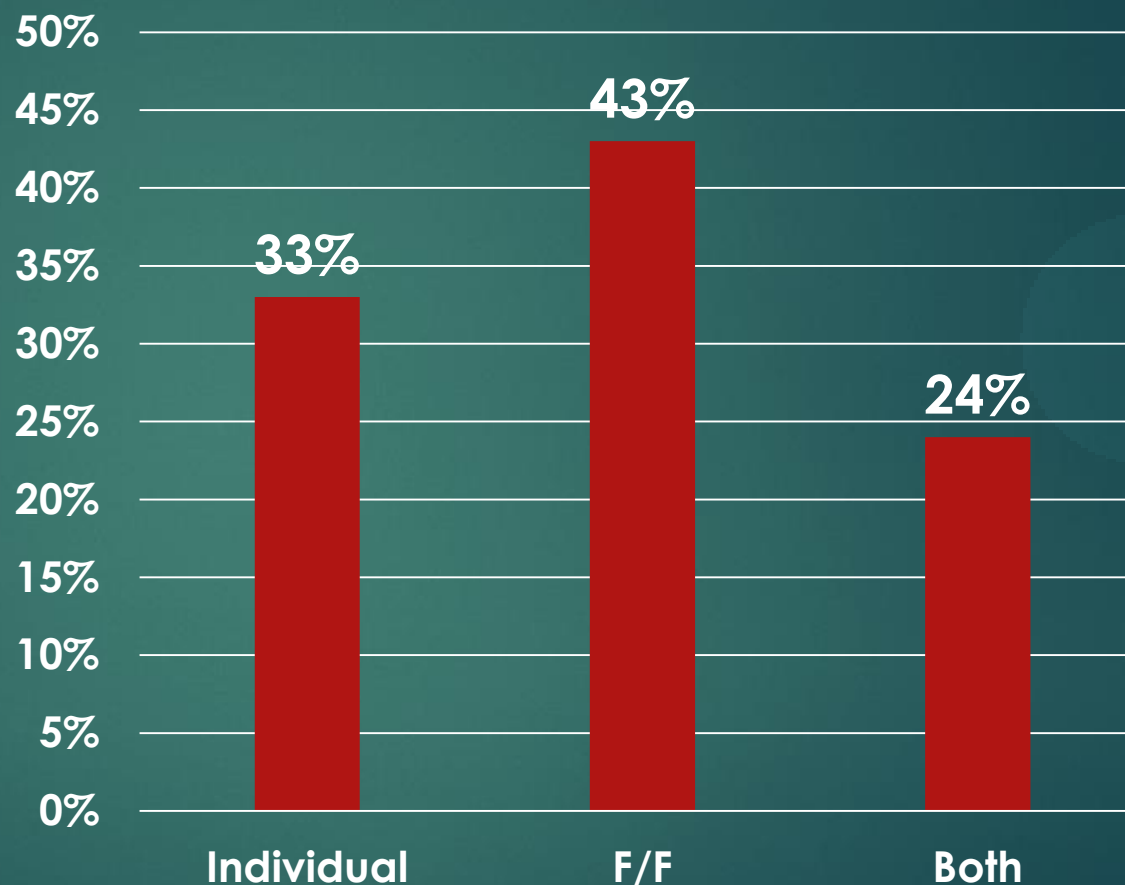

Naloxone “Saves”: North (1/1/18 – 12/31/18) (n=587 Naloxone Admin)

Naloxone was administered in **587 (57%)** of the reported fatal and non-fatal incidents. Ninety-five percent (555) of these events were non-fatal, while 5% (32) of these overdoses resulted in a fatality.

North: Follow-Up Visit Contacts 1/1/18 – 12/31/18 (Preliminary)

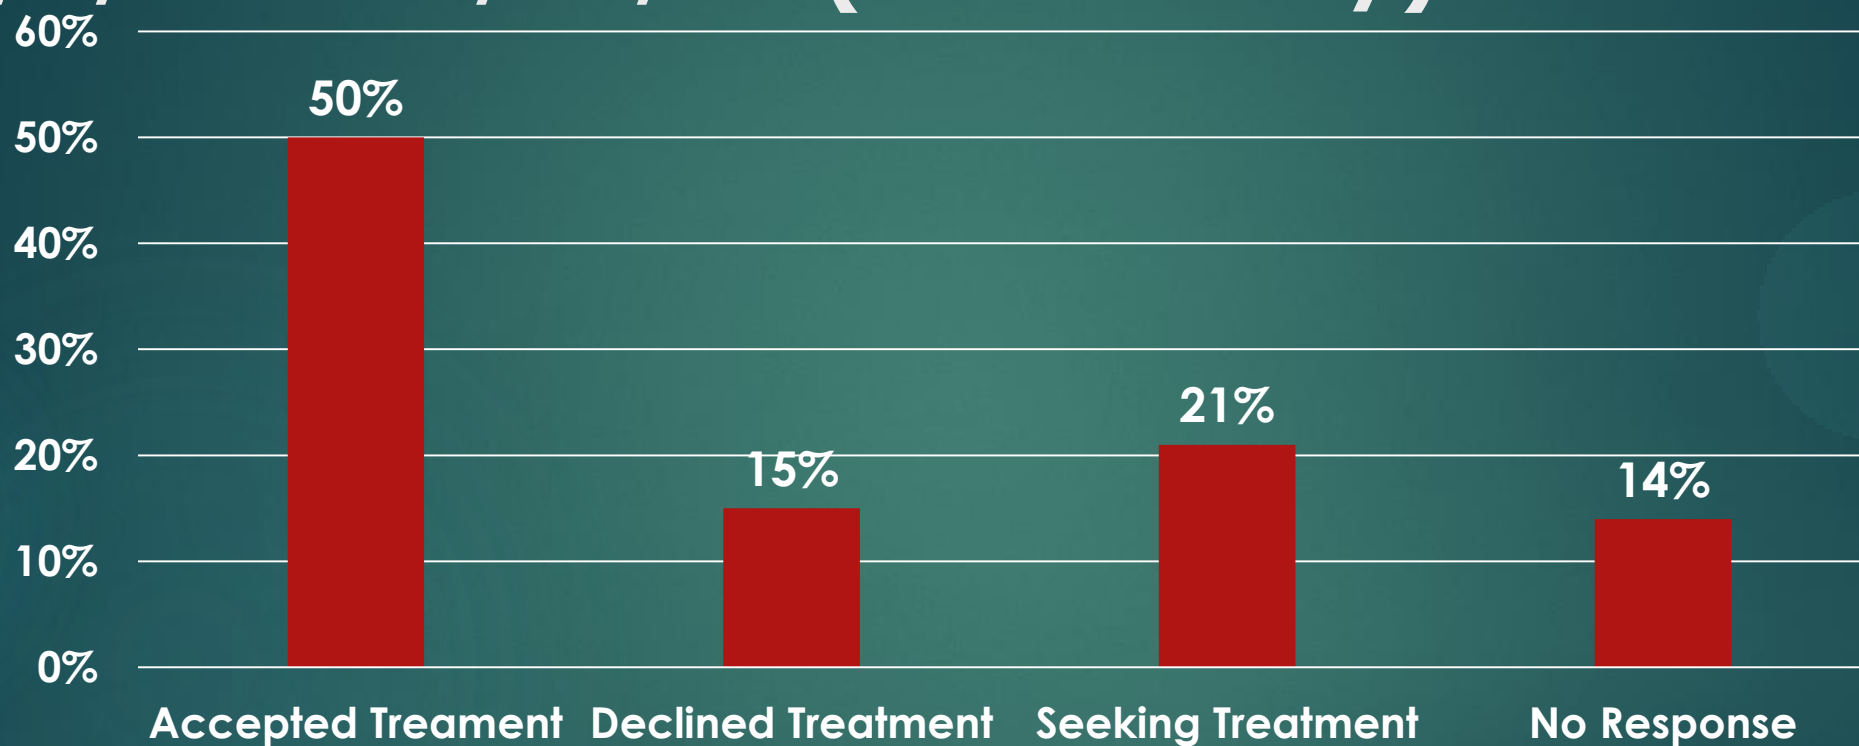

- **609** attempted home visits
- **61% (374)** were successful in having contact with either the individual who overdosed, a family/friend, or both.

Thirty-three percent (123) of the successful follow-up visits (374) resulted in contact with the individual that had overdosed, **43% (162)** resulted in contact with Family/Friends, and **24% (89)** resulted in contact with **both** the individual and family/friends.

North: Successful SUD Contact Outcomes 1/1/18 – 12/31/18 (Preliminary)

Kelley Research Associates

Of the 212 successful contacts with the SUD (SUD Only and Both): **50% (107)** resulted in the individual accepting treatment from the outreach team; **15% (32)** declined the treatment options; **21% (44)** were already seeking treatment; and **14% (29)** did not have a response entered in the database.
