**MAY 4, 2020**

# County-wide Preliminary Data: 1/1/20 – 4/30/20

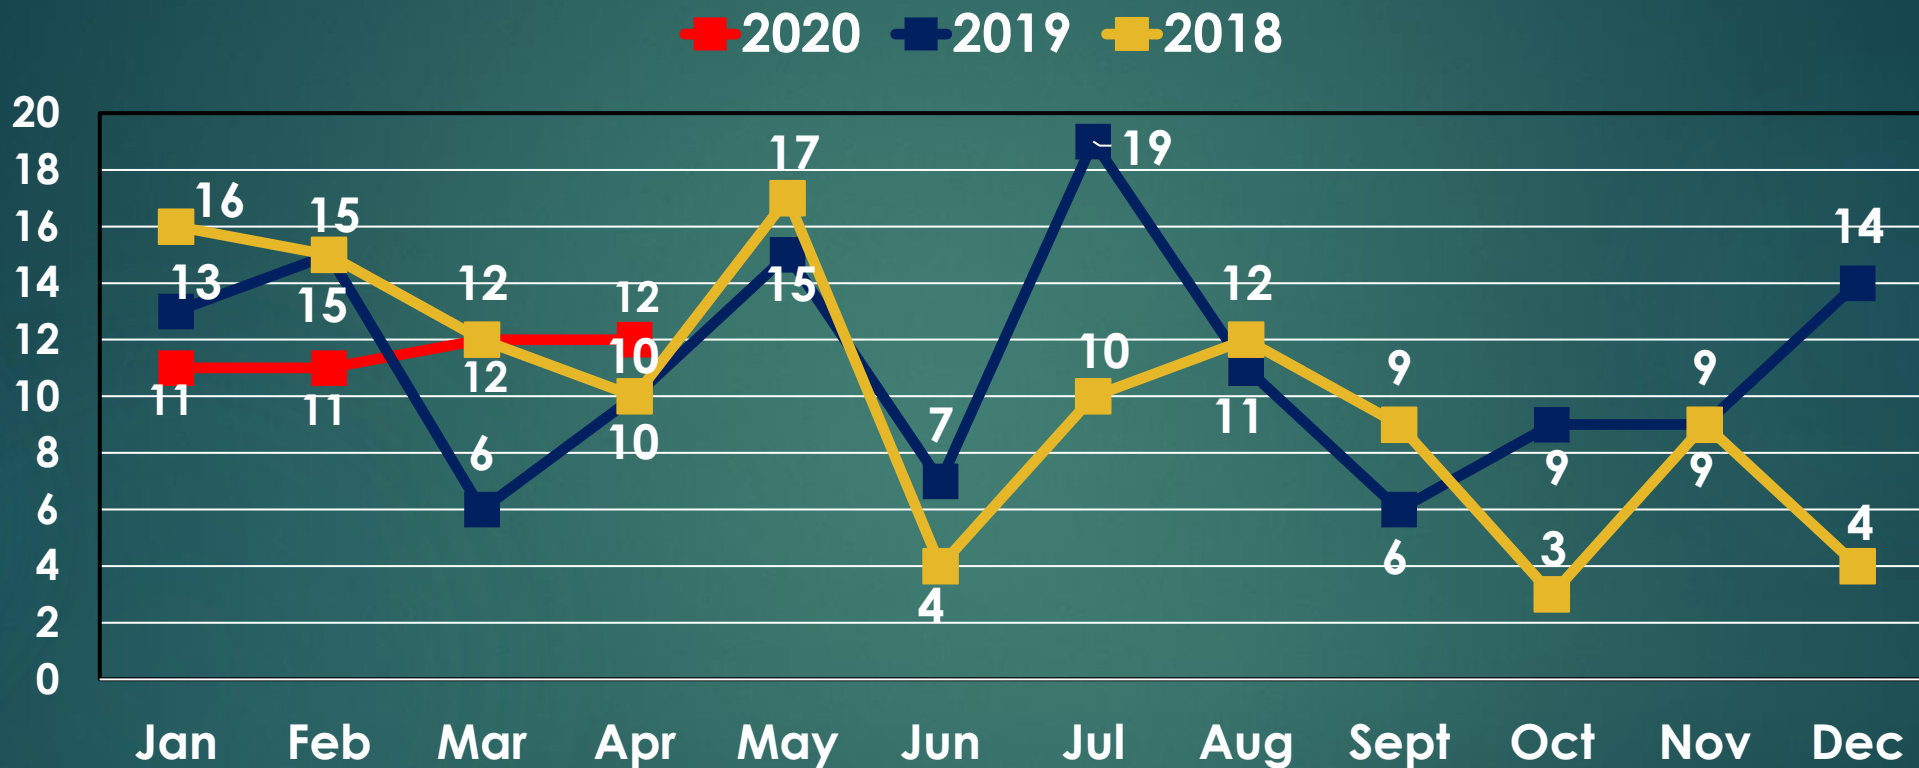

# Type of Incident: 1/1/20 – 4/30/20

Kelley Research Associates

There were a total of **492 incidents (OD and At-Risk)** recorded in Plymouth County between 1/1/20 and 4/30/20: **46 (9%) were fatal; 386 (79%) were non-fatal**; and 60 (12%) were categorized as “at-risk” individuals.

# Fatal Incident Monthly Trend

There was on average 11.5 fatal ODs per month, or 46 total, in the County between 1/1/20 and 4/30/20. This is a 5% increase over the 2019 monthly average of 11 or 44 total, for the same time frame.

# Non-Fatal Incident Monthly Trend

Kelley Research Associates

There was on average 96.5 non-fatal ODs per month, or 386 total, in the County between 1/1/20 and 4/30/20. This is a 2% increase over the 2019 monthly average of 94.8, or 379 total, for the same time frame. Note, there was a 15% decrease in non-fatal overdoses between March 2020 and April 2020.

# At-Risk Monthly Trend

There was on average **15 At-Risk entries per month, or 60 total**, in the County between 1/1/20 and 4/30/20. This is a **11% increase** over the 2019 monthly average of 13.5, or 54 total, for the same time frame.

# Incident vs. Resident Town: 1/1/20 – 4/30/20

Kelley Research Associates

Analyzing just the 432 overdose incidents, **285 (66%)** of the OD incidents between 1/1/20 and 4/30/20 occurred in same town that the person lived in. However, in **147 (34%)** of the incidents the person was from a different town than where the incident occurred.

# Naloxone “Saves”: 1/1/20 – 4/30/20

## Thirty percent (89)

of these incidents involved Naloxone being administered by a 3<sup>rd</sup> party family/friend prior to first responders arriving.

■ Save  
■ Fatal

Kelley Research Associates

Again, analyzing just the 432 overdose incidents, Naloxone was administered in **292 (68%)** of the reported OD incidents. **Ninety-four percent (274)** of these events were non-fatal, while **6% (18)** of these overdoses resulted in a fatality.

# Follow-Up Visit Contacts 1/1/20 – 4/30/20

- **256** attempted Follow-up Contacts
- **57% (147)** were successful in having contact with either the individual who overdosed, a family/friend, or both.

**Fifty-three percent (78)** of the successful follow-up visits (147) resulted in contact with the individual that had overdosed, **33% (48)** resulted in contact with Family/Friends, and **14% (21)** resulted in contact with both the individual and family/friends.

# Successful SUD Contact Outcomes

## 1/1/20 – 4/30/20

Kelley Research Associates

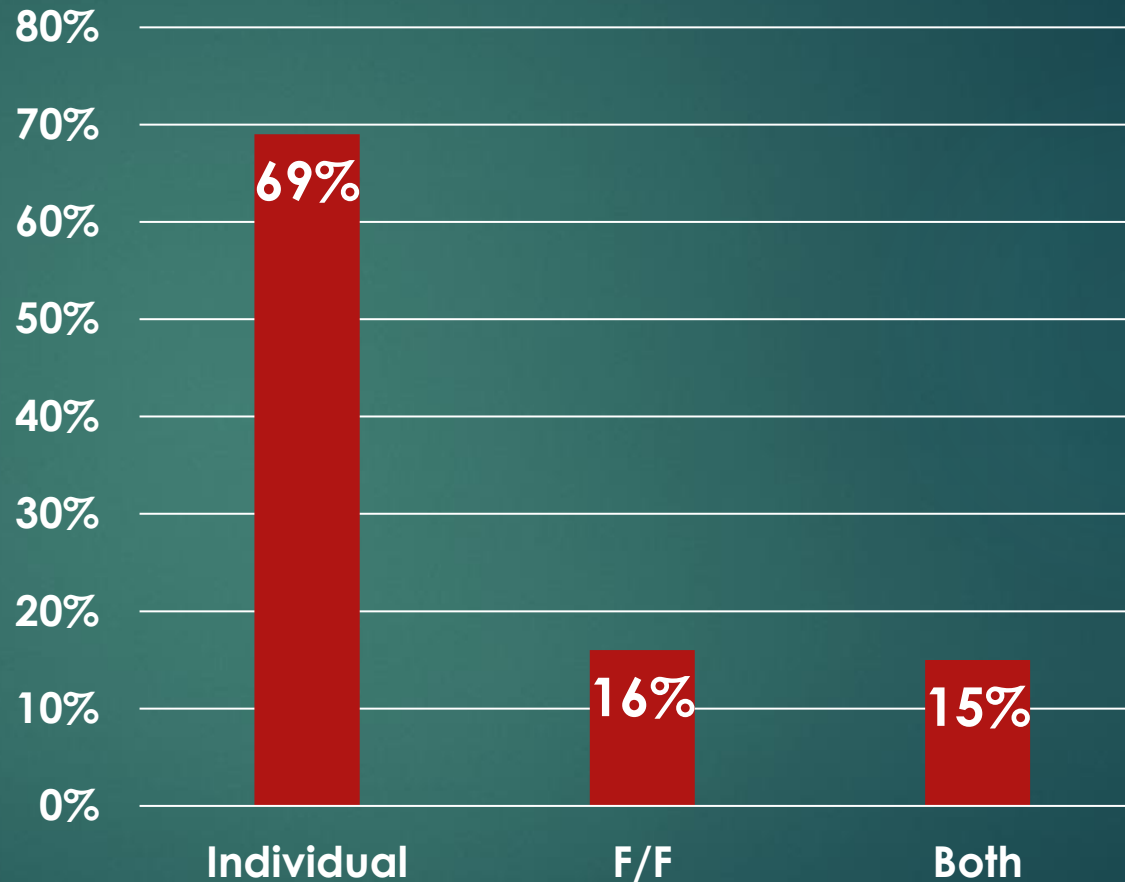

Of the 99 successful contacts with the person the overdosed (SUD Only and Both): **63% (62)** resulted in the individual accepting treatment from the outreach team; **15% (15)** declined the treatment options; **15% (15)** of individuals were already seeking treatment; and **7% (7)** of the follow-ups did not have a response to these measures recorded in the system.

# Tier 2 Follow-Up Analysis

# Tier 2: Follow-Up Visit Contacts

## 1/1/20 – 4/30/20

- **131** attempted outreach visits (in-person, phone, electronic, other)
- **81% (106)** were successful in having contact with either the individual who overdosed, a family/friend, or both.

**Sixty-nine percent (73)** of the successful follow-up visits (106) resulted in contact with the Tier 2 client, **16% (17)** resulted in contact with Family/Friends, and **15% (16)** resulted in contact with both the Tier 2 client and family/friends.

# Tier 2: Successful SUD Contact Outcomes

## 1/1/20 – 4/30/20

Kelley Research Associates

Of the 89 successful contacts with the Tier 2 client (SUD Only and Both): **33% (29)** resulted in the individual accepting treatment from the outreach team; **4% (4)** declined the treatment options; **52% (46)** of individuals was already seeking treatment; and **11% (10)** of the follow-ups did not have a response to these measures recorded in the system.
